

Comprehensive Labeling of Your Warehouse

L-mobile is your partner for efficient storage labeling—we offer the right labels and provide comprehensive advice for your warehouse optimization

Labeling shelves, areas, containers, and load carriers to suit your requirements

Comprehensive advice

We not only offer you the right labels, but also provide you with comprehensive advice for meaningful systematics and installation of storage labeling.

Labels for every application

Whether shelves, free locations, or containers—our portfolio includes various types of labeling, ensuring we find the right solution for your warehouse structure.

Suited to your conditions

UV radiation, forklift traffic, temperature exposure: we take into consideration the stresses as well as the system requirements of your warehouse.

Durable and resistant

Using professional labels makes your labeling solution durable—ensuring long-term use without frequent replacement.

Reliable posting of goods

Good storage labeling combined with mobile data collection provides the basis for the fast, reliable, and efficient posting of goods.

Work is made easier

We help you create the basis for simple and smooth workflows. Uniform color coding and symbols aid orientation in the warehouse.

Greater flexibility

Respond flexibly to changing order volumes—new personnel and temporary staff are able to find their way around more quickly thanks to uniform labels.

Significant time savings

We are your partner for the implementation of digital and efficient warehouse management. Together, we optimize your processes for maximum transparency and time savings.

Advice regarding meaningful and durable storage labeling

Meaningful storage labeling is the foundation for [structured and efficient workflows](#) in the warehouse. Labeling therefore has a considerable influence on all [downstream processes](#) and needs to be well thought out. As your contact for all aspects of digital warehouse management, our company has the in-house expertise—both in terms of [hardware](#) and [software](#)—to ensure the comprehensive implementation of your project.

As part of our consultation, we focus in particular on the physical [conditions on site](#) and identify the corresponding requirements for [professional labeling](#). For example, we will discuss the following aspects:

- The existing storage bin structure and hardware
- Environmental conditions: UV radiation, humidity, mechanical stress
- Flexibility required for the attachment of labels
- Scanning distance
- Label design: Size, coding, clear text
- Color coding and symbols
- Design customizations

We will be happy to send you sample labels and [sample PDFs](#) with your original data before printing the order. You can thus be sure that the chosen labels satisfy [your requirements](#).

Various types of labels for your individual requirements

To exploit the full potential of your warehouse, you can choose from a [wide range of different labels](#):

- Shelf labels for single locations
- Multicolor and multilevel labels
- Floor markings with metal frames or embedded as floortags
- Retroreflective labels for long-range use
- Flexible magnetic labels
- Suspended or mounted storage labels/signs
