

In Use at PASS

Thanks to the L-mobile warehouse solution, the warehouse clerks can now respond more quickly to individual customer demands.

Just-in-Time delivery is now also supported by the mobile warehouse management solution.

Challenge

German family-owned company [PASS GmbH & Co. KG](#) is an automotive supplier with four branches in Germany as well as additional production facilities in Poland, Slovakia, Mexico, and China.

As a specialist in the development and manufacturing of rubber, plastic, and system components, the company must be able to respond rapidly to ever-changing customer demands. PASS also needed to find a way to [speed up](#) goods receipt, order picking, the supply of the necessary parts to production, and [goods issue](#).

Based on the successful working partnership between [Infor COM](#) and [L-mobile](#), PASS decided to implement our mobile warehouse management solution and is very satisfied with the results.

Solution

PASS was able to optimize its warehouse processes by migrating from its existing integrated solution to the mobile software solution [L-mobile warehouse ready for Infor COM](#). With the mobile solution, warehouse clerks are able to record multiple pallets at a time for block storage with the aid of a [PDA](#). This results in significant time savings and means that the data is available in real time in [Infor COM](#).

Furthermore, the company can respond to new customer demands quickly and easily, such as changes to shipping instructions. Production is now also able to communicate directly with the warehouse and procurement requests are issued via the mobile warehouse management solution. Using mobile scanners, warehouse clerks are not only able to track changes at their own location, but at all other branches too, and they can access this stock on demand. The implementation of [L-mobile warehouse ready for Infor COM](#) has also enabled PASS itself to ensure [Just-in-Time delivery](#), giving the company a significant competitive edge.

Conclusion

PASS is **very satisfied** with the way L-mobile handled their project, and with the collaboration itself. The mobile solution impresses with its **stability, reliability, flexibility, and responsiveness**. The simple and intuitive user guidance ensured the smooth implementation of **L-mobile warehouse ready for Infor COM**, and users quickly got on board with the mobile software solution.

In addition to the rapid and individual processing of sales orders, the scanner function also enables **Just-in-Time delivery**. Another advantage of the solution is that multiple pallets can be **scanned in one go** for **block storage**. This not only saves time, but also significantly reduces the risk of error.

“We were impressed by the smooth operation of L-mobile warehouse. The swift help and support in implementing adaptations is also a real bonus,” reports Martin Hesse, Logistics Manager at PASS GmbH & Co. KG. “We’re very satisfied with L-mobile. Thanks to the mobile solution, we are able to realize customer-focused project management with short response times.”

In addition to warehouse operations, the company is also optimizing its production processes with the help of **L-mobile production**.

Highlights

- Instant, in-process posting in Infor COM
- Mobile recording and faster handling of warehouse processes
- Customer-specific order processing supported
- Optimization of processes between the warehouse and production
- Incorrect postings are consistently avoided
- Maximum transparency in stock and inventory
- Latest information always at your fingertips
- 100% mapping of individual processes
